Managing Office 365 Identities and Requirements

QUESTION: 177

You are employed as an administrator at ABC.com. ABC.com has an Active Directory Domain Services domain, named ABC.local. ABC.com would like to employ Office 365 services to allow cooperation among their divisions. Subsequent to deploying the Windows Azure Active Directory Sync tool, you are instructed to configure single sign-on (SSO) for Office 365. You want to make sure that only the user accounts that have legitimate routable domain names and belong to certain divisions are synchronized. You have added the ABC.com UPN suffix to the ABC.local domain. You now want to alter the UPN suffix to ABC.com for users in the defined divisions.
Which of the following is the snap-in you should make use of?

A. The Certificates MMC snap-in.
B. The Active Directory Users and Computers MMC snap-in.
C. The Active Directory Domains and Trusts MMC snap-in.
D. The Distributed File System MMC snap-in.

Answer: B
